

SHOULDER SLEEPER

The ShoulderSleeper Pillow™ is a patent-pending supportive device designed to improve sleep comfort following surgery. Built to support the shoulder, elbow, and wrist, it helps maintain your arm in the ideal position for recovery.

WHO IT'S FOR

Patients recovering from shoulder and elbow surgery (rotator cuff repairs, labral repairs, TSA and rTSA)

Overhead athletes

Back- and side-sleepers with shoulder pain or discomfort

HOW IT WORKS

ARM BAR TAPERING

Prevents excessive motion of the shoulder and arm while sleeping on your back and side

BODY CURVE

Conforms to the shape of your body to move with you as you change positions between back- and side-sleeping

PRESSURE POINT RELIEF

Reduces areas of high pressure on ulnar and axillary nerves to prevent numbness and tingling

SECURESTRAP

Secures the pillow and arm in place during sleep
